1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Toshiba JP-2001-316744. (Toshiba)

Reference is made to the English language abstract and to the following portions of the machine translation of Toshiba: paragraphs 0011, 0032-0043 and Table 1 and in particular the third listed alloy therein. These portions of Toshiba set forth a negative electrode including the claimed alloy and the particular carbon type claimed. In view of the fact that Toshiba sets forth the claimed alloy, it is inherent that the same would possess the properties as set forth in the last four lines of each of claims 1 and 2, i.e., it would have a hydrogen content not above 0.01 weight percent and a water content not above 0.13 weight percent.
